

# **Zim Benefactors Funding the Revenue Sharing Solutions Program in Your Area or Country**

The Love Won Society (LWS) Programs starts with the Revenue Sharing Solutions (RSS). This flow of money is used to financially support all LWS programs implemented wherever it begins. We welcome those Zim holders who want to become Zim Benefactors with Love Won Society, your participation will start with the implementation of the RSS program in your area or country.

## **What will it take?**

The RSS platform should be up and running 6-8 weeks Post RV. The completion of our series of Wealth Management Videos, which will be embedded in the Individual Beneficiary's Personal Office on their website, will determine the time factor for launch. LWS will coordinate with those who want to implement the RSS program in their area during this pre-launch time period. Love Won Society (LWS) will formulate an agreement between Zim Benefactors and LWS to identify the responsibilities of both parties. This agreement will begin the RSS participation of each Benefactor.

Once the RSS program begins, it will be hard to control or contain, even perhaps, impossible. Each individual Zim Benefactor (ZB) who wants to position themselves for doing the RSS program will need to have

received a very high rate at the Zim redemption to sustain the projected growth over many years. LWS recommends a high redemption rate of \$500,000 per Zim dollar with a 10% interest rate for the term of the structured payout. We also recommend the longest term available. (The med beds and other advanced technologies will ensure our longevity)

**Let's do some math.** One, 100 Trillion Zim Bond note at a rate of \$500,000 per Zim, equals 50 Quintillion. Using the recommended 10 percent of the Primary Principle for your Structured Payout annual payment, it equals \$5 Quintillion per year. If you were to divide the annual payout of one share per year, \$52,416, into \$5 Quintillion it would equal over 95 Trillion shares per year that can be paid. This might look like overkill initially but when you consider the whole of the Love Won Society program; with the National Real Estate Listing Service, the ESS, and the International Commodity Clearing Houses, and the fact that the RSS Platform is the basis of all of these programs, you can see the wisdom in asking for this high rate. You might need some help, especially if you are doing the LWS program for your entire country, but if you have received the higher suggested rates, Love Won Society may act as a buffer to be sure you don't run out of money.

Back to the RSS program. The Individual Share and the Employment Contract Shares are a tandem effect for one individual. The individual can participate in both Share structures at the same time. At \$52,416 payout for the Individual Share and the Employment Contract Share at \$131,400, the individual will be receiving at least \$183,816 per year.

The Individual Share program allows SIX (6) trust shares per individual. The individual can establish the trust shares for any reason they feel inclined. It may be for minor children, or a mentally challenged person,

or a work-related need such as for teachers or clubs, etc. that the individual can be a trustee for. Trust must have its own trust account in the QFS to receive the money. Post RV, you can establish your own accounts in the QFS using your access code. The payout from the share must be used as per the Trust documents. When you go through the redemption appointment they will have revocable trust documents to establish your own trusts. Use these documents for each of your trusts. A trust doesn't need to be registered with the government to be legal but the Trust Document is needed to create a trust account in the QFS to receive the RSS funds.

Each Trust Share receives the 10 cents per minute download. As the Trustee of the Trust, each Beneficiary will have an additional \$52,416 per Trust per year to control. Add all six to the original Share, and that equals \$366,912 per year. If a couple were to each complete the full potential of the RSS Share program with the additional Trust Shares, they would be receiving 733,824 per year. This should be sufficient to create the Abundance mentality, which is the purpose of the RSS Share program. The Employment Contract Share would be in addition to that.

The Employment Contract Share (ECS) may have varying per minute payout at the start but the average will be 25 cents. The ECS will have **quarterly** raises of 1 cent or about \$400 per month increase per quarter. Over the 84 months of the seven-year contract, the employee will receive an increase of 28 cents per minute payout, the same as doubling the original share payout. The employee will have free healthcare and together with the ECS, both will act as a retirement benefit for the rest of their lives. The Employment Contract Share does not participate in the Individual Share bonus program.

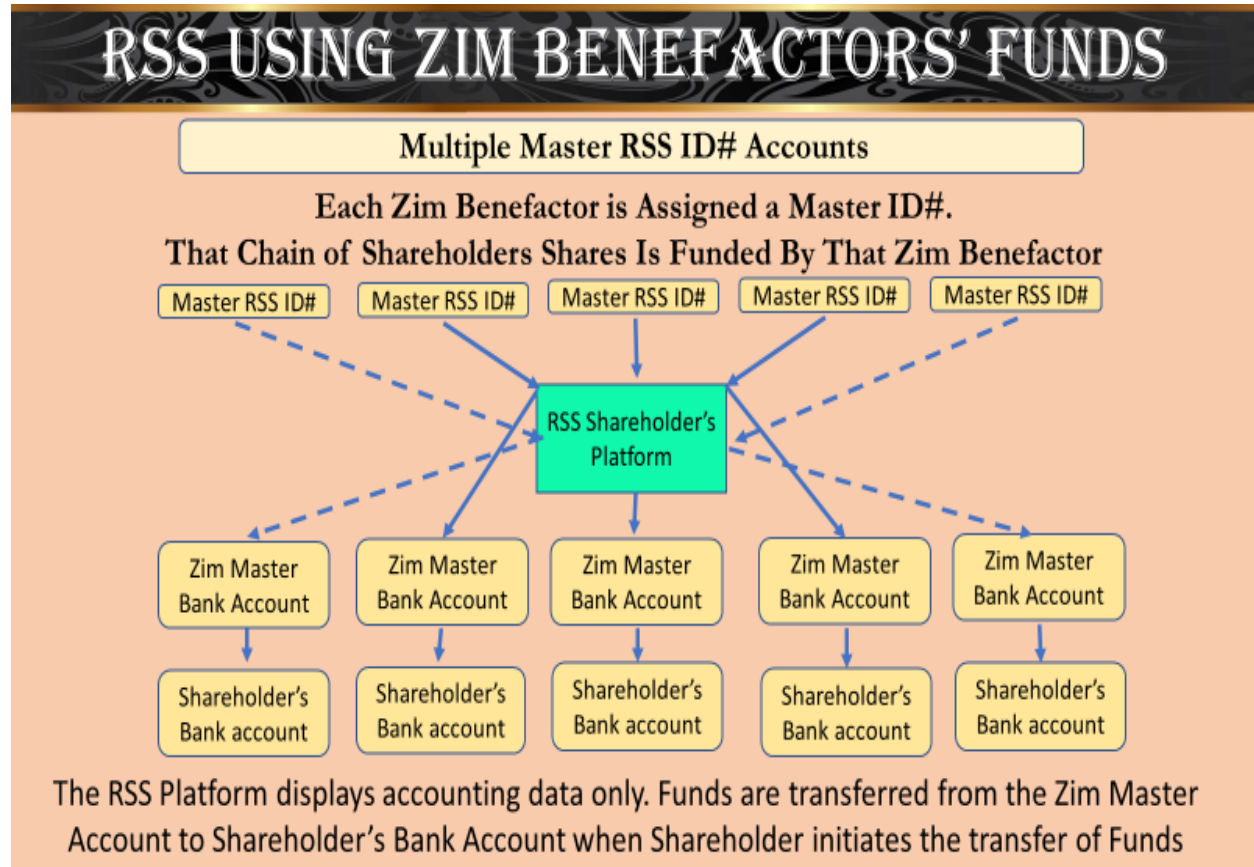

As you can see the RSS program can mushroom into a very sizeable requirement of funds to sustain, even without taking into consideration the participation in all of the rest of the LWS programs.

With the imminent possibility of 6000 new technologies to bring to society and the personal projects each individual might want to do, the need for the higher rates will be a necessity.

Continued below

## How will the platform work?

The Following graphics explain how the flow of funds will work.

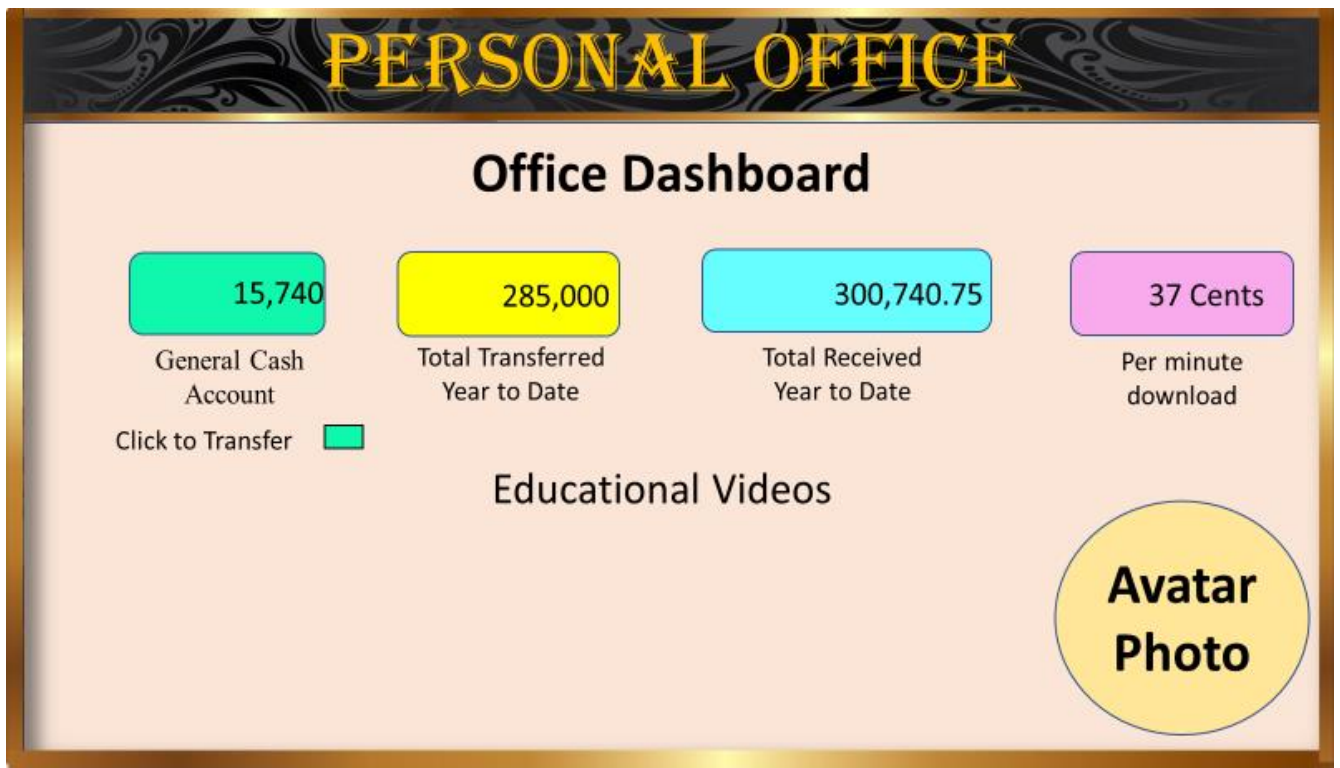

Each Zim Benefactor (ZB) who wants to participate in funding the RSS program in their area, will receive a Master RSS ID#. The RSS internet platform will be used worldwide with each ZB funding their chain of beneficiaries in their area or country. Tens, maybe hundreds, of ZB can be used without stepping on each other's chain of beneficiaries in a given area or country, the chain of beneficiaries will not know who is the Benefactors of their chain. However, it might be necessary to separate one country from another to accommodate the possible differences in the per-minute Share download for each country. The per-

minute download for a share may be scaled up or down to work within the economic factors within a country. Those who do the RSS program for a country will provide input as to the appropriate per minute payout for that particular country. It must be appropriate but it must have a degree of overwhelm to accomplish the Abundance mentality.

### More graphics.

With the Master ID# identifying the ZB, the RSS platform keeps track of the program data and produces the reports for the Personal Office. See the graphics of the Personal Office below.

To most Beneficiaries, the green General Cash Account (see above) will have the most interest. This is how much is available for them to download for their use. Click transfer and it will take you to another window to choose how much of the total you want to download. You put

in the figure and click download and it is deposited in your QFS account immediately for you to use.

It will be user-friendly for the accounting buff to use. Just simply click on the box and it will take you to color code pages where you can see all the justifications for the totals. The download transfer must be initiated by the Beneficiary. This keeps the Beneficiary in control of his/her funds. The RSS platform will be large enough to support every Beneficiary all over the world if they have access to the internet.

## **Working with the RSS Bonus Program**

The Beneficiary can increase his/her per minute download by participating in the Bonus Program by sharing the RSS program with others.

**The \$50 Thank You Bonus:** There is a \$50 one-time bonus for each person Registered using the Beneficiary's User ID#.

**The Registration Bonus:** the Beneficiary will receive an additional permanent, 1 cent per minute increase for every two Beneficiaries registered using that person's User ID#.

**The Generation Bonus:** comes into play if the Individual Beneficiary registers a club or a religious organization's congregation. The president or clergy would register the organization with the members signing up under the organization's User ID#. That gives the organization a 1cent

per minute payout increase for every two persons registered in the congregation. A 100-person organization would receive an additional 50 cents per minute increase in download, effectively giving the organization just under \$300,000 per year to keep functioning.

The Beneficiary who registers the Organization would receive a bonus of 1 cent for every ten people who register under the organization's User ID#. This is the Beneficiary's First Generation.

This goes two generations deep. If the president or clergyman registers and then registers the organization then he/she would be the first generation and would receive the first generation 1 cent per minute for every 10 people in the Generation Bonus. The person registering the president or clergyman would receive the second-generation bonus at the same 1 cent per minute increase for every 10 people the president or clergyman was to register. Then there is the Third Generation after that. Each generation triggers the one cent per 10 people Generation Bonus. A Beneficiary can bring in many congregations and earn the generation bonus on as many as he/she registers. This can be a full-time job with income that just keeps ongoing.

## **Using the Registration Calling Card.**

The card is designed for an introduction to the RSS program and uses Billionaires not Trillionaires to establish credibility for the program. The average Beneficiary will not know about the Quintillions of dollars behind the RSS program.

## Possible Front

### **Nine Billionaires to, “Share their Wealth.”**

#### **“Revenue Sharing Solutions”**

**An Internet Platform to Distribute Wealth**

#### **Revenue Sharing is designed for:**

- Families
- Single persons
- Single Parents
- ~~Middle~~, Any Class
- Homeless persons
- Students
- Business People
- Professionals
- Fast Food Employees
- Retail Clerks
- Sales People
- Artists
- Religious Organizations
- Non Profits
- Businesses Owners
- Veterans
- Retired Persons
- **Anybody**

## Possible Front

**Intentionally left Blank**

**\$10 per Share = \$144 per day**

**Nine Billionaires set up an Internet Platform to Distribute Wealth  
“Revenue Sharing Solutions”**

Introductory Information and Registration found at:

RevenueSharing.Solutions

Your participation is welcomed

Participation is by Referral Only

You are Referred by: \_\_\_\_\_

User ID:

The card has multiple uses. It may be used for a casual interaction introducing the RSS Program or as a reference card when used with a lot of people at once. The card can be given to a person with the request to go to the website and get more information. They will have all the information on the card to get to the website, find the information they need to make a decision, and then register using the referral User ID#. The front and back of this example may be copied and used to obtain your own set of 500 cards or so. It will cost around \$35 at Quick Print or Vista Cards online for 500 colored cards on standard stock.

**Note:** The slides are PowerPoint Presentation slides. You can design your own cards and upload them to a card company for printing. I suggest you have them set the slide in their format for the best results.

## Sample of the registration form.

**REVENUE SHARING. SOLUTIONS**

### New Share Account Registration

Referring User ID: (Who referred you to Revenue Sharing Solutions? Required!)

Name: \_\_\_\_\_ Individual  Non-Profit  Trust

Email Address: \_\_\_\_\_ Age \_\_\_\_\_

Your User ID: (Use a combination - Capital and Small letters, numbers, and symbols)

Choose carefully – once registered, it can not be changed.

Pin #: (Suggest min 8 spaces. \_\_\_\_\_)

Payment Information:  
(Programing NOTE: use standard form to include back of card ID numbers)

Policies and Procedures file  Definitions file  Questions and Answers files  Videos

I have read and agree to the Policies and Procedures

The minimum age for a Shareholder is 18.
